Detailed instructions can be found on our website www.pergo.com and/or packaging.

5. The floor may not be installed in damp and/or humid areas or in extremely dry areas or areas where there are extremely high temperatures (such as saunas).
6. Cooking islands for kitchens and other very heavy objects (like build-in cabinets, ...) should not be fixed / screwed or placed on top of the laminate. The laminate floor must be able to move around the heavy objects to avoid open joints and separating planks. The dilatation gap size must be respected around the complete perimeter of the installation, including all heavy / fixed objects.
7. Moisture and/or water spills left on the floor, and on or around the skirting boards, wall bases or profiles, is to be removed immediately on all non- water resistant Pergo laminate floors. Inappropriate cleaning products can create a film on your floor that attracts dirt and/or is difficult to remove.
8. This warranty does not cover:
 - Damage caused during storage, handling or other treatment before installation.
 - Installation error.
The Pergo product must be installed following the Pergo installation method using the approved Pergo / SmartFinish accessories. Only Pergo / SmartFinish approved underlays can be used for the laminate flooring system to be covered by this extra-legal warranty.
 - Accidents, abuse or misuse, such as scratches, blows, cuts or damage caused by sand and other abrasive materials, whether caused by a contractor, a service company, or end user. Relevant ambient factors, the duration and the intensity of use of the product must be taken into account to determine whether the wear is abnormal.
 - All damages caused by natural disasters (i.e. flood), naturally occurring conditions, ...
 - Damages caused by accidents (i.e. plumbing failures, pet urine, leaking dishwashers, or other corrosive or abrasive substances) or water/humidity in and between the subfloor and the floor covering.
 - Water damage caused by ice machines, refrigerators, sinks, dishwashers, pipes, natural disasters, excessive moisture in concrete slabs, hydrostatic pressure, etc. In case of the presence of water and/or moisture on the floor and/or around the skirting boards, this must be removed immediately, except for the water resistant Pergo laminate floors: see further.
 - The reduced resistance of the traditional non-pressed bevel.
 - Exposure to extreme temperature and relative humidity variations.
 - Damages caused by inappropriate cleaning products.
 - Damages caused by improper maintenance:
 - For Pergo laminate floors with water resistance warranty, wet maintenance is allowed.
 - For Pergo laminate floors with water resistance warranty and pressed bevel, the use of a steamcleaner is allowed if there's no steam directly coming on the laminate. So it must always be used with an appropriate cloth on the steam opening, which guarantees also an homogeneous heat and steam distribution. It is also important to take care to hold the apparatus not too long in the same place and clean the floor in the length direction of the design.

2. The floor may not be installed in very humid areas or in extremely dry areas or areas where there are extremely high temperatures (such as but not limited to saunas, pool areas and rooms with build-in drains like showers).
3. Moisture left on the floor, and on or around the skirting boards, wall bases or profiles, is to be removed within the indicated timeframe in the warranty table . All expansion gaps must be filled with a very compressible PE foam (NEFOAMSTRIP20) and sealed with an elastic waterproof transparent paste (PG Aqua Sealant) according to the installation instruction. For colourmatched parquet/standard skirtings and colourmatched scotia, use also the hydrostrip. Wall bases, profiles and door trims must be sealed on top of the NEFOAMSTRIP20 compressible foamstrip along the wall and along the flooring.

Exposed PG Aqua Sealant and Foamstrip need to be checked on a regular basis (3y) to ensure a watertight finish without mechanical damage.
